COURSE DESCRIPTION: An introduction to computer programming. Its primary objective is to teach problem solving using the C++ programming language. Emphasis will be placed on structured procedural programming with an introduction to object-oriented programming. Designed primarily for computer science and related transfer majors.

STUDENT LEARNING OUTCOMES:

- Design solutions for introductory level problems using appropriate design methodology incorporating elementary programming constructs.
- Create algorithms, code, document, debug, and test introductory level C++ programs.
- Read, analyze and explain introductory level C++ programs.

TEXTBOOK: *Starting Out with C++: From Control Structures through Objects* by **Tony Gaddis**. 8th EDITION (ISBN-13: 978-0133769395 ISBN-10: 0133769399)

LECTURE NOTES: Will be provided online on Catalyst

CLASS NOTES: Many of the class exercise answers and announcements will be posted in Catalyst (<https://catalyst.deanza.edu>) on a week-by-week basis.

COMPUTER LAB: You may use our computer lab or your own (or another) computer and compiler. If you don't use our computer lab, you need to have a C++ compiler in order to do homework assignments. If you're enrolled in this class, you will automatically have an account in our classroom and AT203 Open Computer Lab (if you're adding, add online in Admissions office, wait about 20 min. before using the open lab). Bring a flash drive to the Computer Lab to back up your programs or remember to email to yourself.

COURSE OUTLINE (subject to change): This is a hybrid class. Meet in person on Tuesdays and Thursdays, 1:30-3:20 PM. The rest will be presented in Catalyst. The instructor will be online Fridays, 1:30-2:50 PM.
